is best to convert all text to Outline and flatten all images to ensure at nothing is missed out or changed during the transfer of files.

sing guidelines to remain within the margins will prevent mistakes and save your artwork elements from getting cut off.

he "Bleed Zones" are hidden inside the hardware. However, s STRONGLY Recommended that you extend your background graphics to the edges to the art board ensure proper bleed with no visible unprinted areas.

This file is itself a template and can be edited to design your graphics. lease make sure to delete this layer before submintting your artwork or it will be printed in your finished product.

**DF** is the best format to submit your artwork work. lowever, we also accept thesefile formats, as below: ustrator(AI / EPS) Photoshop(Tiff)
